COURTSIDE

A clear, fair queue for every court.

A local-network pickleball queue to coordinate players, courts, and match rotation from one shared view.

FOR CLUBS / RECREATION CENTERS / COMMUNITY PLAY

THE OPPORTUNITY

Keep play moving. Make the queue easy to follow.

Help organizers see who is next, which courts are ready, and how to keep players and groups organized during busy open-play sessions.

01 / CLARITY

One shared queue

The same live session on phones, laptops, and TV.

02 / FLOW

Organized rotation

Start when a court is ready. Rotate after each match.

03 / FAIRNESS

Player context

Track skill, game counts, and locked partners.

HOW IT WORKS

Four steps from check-in to the next game.

01

JOIN

Register with QR or organizer entry.

02

QUEUE

Wait in order; locked partners stay together.

03

PLAY

Organizer starts the next group on a ready court.

04

ROTATE

Finish, then return players to the back of the queue.

Matches start manually so players go on when the venue is ready.

DESIGNED FOR THE VENUE

One session. The right view for everyone.

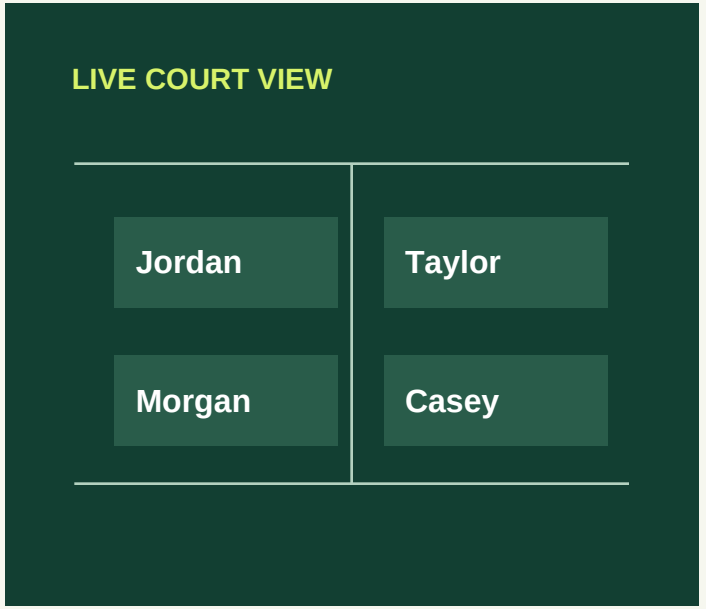
+ **TV DISPLAY**
  Courts and waiting queue at a glance.

+ **ORGANIZER CONTROLS**
  Manage players, courts, matches, returning players.

+ **PLAYER REGISTRATION**
  Scan a QR code and join from a phone.

+ **LIVE UPDATES**
  Changes appear across connected devices.

+ **VENUE IDENTITY**
  Add a logo and choose light or dark mode.



PRACTICAL OPERATIONS

Built for a venue local network.

SET UP

Run locally

Install Node.js and start on a venue computer.

CONNECT

Use venue Wi-Fi

TV, staff, and players use the same local network.

PERSIST

Keep session records

Queue, courts, directory, and photos save locally.

VENUE NEEDS Computer kept awake / Working Wi-Fi / Devices can communicate

Organizer actions are protected by a PIN. No cloud is required during play.

A GOOD NEXT STEP

Let’s see how Courtside fits your open-play session

Walk through venue setup, map the check-in and rotation flow,
and try a live session with your staff and players.
